Election/Restrictions

1. This application is in condition for allowance except for the presence of claims 28-34 drawn to a microscope which was non-elected without traverse. Accordingly, claims 28-34 have been cancelled.

Inventorship

2. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Allowable Subject Matter

3. Claims 35-41 are allowed.
4. The following is an examiner's statement of reasons for allowance. In claim 35, applicant has claimed an apparatus with the following combination of elements: a rod with convex surface mounted to the extremity of the rod and a selectively activated coating placed over the convex surface. The selectively activated coating originally has non-adhesive properties which ***can then be activated to provide selected regions with adhesive properties when placed to a sample while non-activated regions remain non-adhesive***. In claim 41, applicant also claims a vial with fluid for liberating tissue that is adhered to the selectively activated convex surface. The Examiner did not

find prior art which contained or suggested this combination of features. The closest prior art is the previously cited "Liotta" ('657) which teaches the use of a rod *with a non-specific surface* for tissue transfer.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
